CLAIMS 1-36 ARE PRESENTED FOR EXAMINATION

Applicants' Preliminary Amendment filed November 7, 2005 and Information Disclosure Statements filed January 21, 2009, March 12, 2008, January 28, 2008 and November 7, 2005 have been received and entered into the application.

Accordingly, the application has been amended as indicated by Applicants. Further, as reflected by the attached, completed copies the forms listing the documents, (11 sheets), the cited references have been considered.

None of the references cited or the references discovered by the Examiner upon searching the appropriate data bases teach or would have suggested the presently claimed subject matter. Accordingly, claims 1-34 are in condition for allowance.

Claim Rejection - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 35 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejection - 35 USC § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 provides for the use of an oil for manufacturing a medicament, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejection - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 36 is rejected under 35 U.S.C. 102(a) as being anticipated by the products of nature “Borago or Mucor species”, (note present claims 12 and 36).

Applicants acknowledge in present claim 12 that the triglycerides are products of nature and the present claim fails to impart any feature to the composition that would not be found in nature.
